

**Pre-assembled drippers,**  
with Dubois Agrinovation

# ENSURE AN ABSOLUTE CONTROL OF YOUR IRRIGATION.

OUR SPECIALISTS WILL  
PROVIDE YOU WITH THE  
BEST ADVICE TO CARRY  
OUT YOUR PROJECT.

# Tailor-made for your crops!

**CHOOSE**

## Micro tubing

The length of the tube.

## Drippers and flow rates

The type of drippers (number of gallons / liters per hour).

## Stakes

Spacing between dripper holes (minimum 2"/51 mm).

## ADVANTAGES

- Accurate calculation of the quantity of water poured for each crop.
- Adapts to challenging environments (uneven terrain).
- Easy to repair.
- Complete control of irrigation.
- Great uniformity of watering.
- Important time saving.

- **Pre-assembly** service of drippers to stakes and micro-tube.
- Can be used in all greenhouse projects (vertical greenhouses, standard greenhouses) and soil less culture.
- Ensures efficient watering for different crops.
